# About Us

Il Bisonte is a Florentine institution founded in 1959, specializing in the study of printmaking. Located in the magnificent stables of Palazzo Serristori, the Foundation consists of an international printmaking school, an art gallery, a library, a donation archive, and a historical archive that preserves lithographic works by some of the greatest artists of the 20th century, including Picasso, Calder, Arroyo,

Matta, Carrà, Moore, and many others.

Today, thanks to its extensive range of courses and artist residencies, Il Bisonte continues to be a cultural and creative hub, a dynamic space for education and artistic production, welcoming artists from around the world and blending the craftsmanship of traditional techniques with the most contemporary forms of expression.
